

INVITATION

Launched in January 2023 and lasting 24 months, the Erasmus + Step by Step small-scale partnership Adult Education project aims to:

Create educational resources to support educational actors (adult educators, animators, teachers, volunteers) in their work of teaching and guiding young adults and families, particularly those with fewer opportunities ;

Equip educational actors with the necessary knowledge of the Sustainable Development Goals (SDGs), green and digital skills and tools to help the public they support understand the complex issues of environmental sustainability;

Equip educational players with innovative digital techniques to address green and digital dimensions with adult learners.

Together, the partners will carry out :

research into best practices

a training program for educators

a pedagogical toolbox for educators to use with their target audiences (eco and digital activities).

All productions will be tested and improved and then translated into French, English and Italian, accessible and available to any interested person/organization.

In order to produce interesting and efficient resources the consortium decided to organise a focus group to have feedback and contributions from educational players and stakeholders before the conception of resources.

Focus group invitation

Programme

Hosting the participants

Presentation of the Step By Step project – goals, work packages, steps

Exchange on the work package 2 and the future training

Roundtable presentation of the feedback of the workshops

Further steps and involvement of the participants in the next steps of the project

Evaluation and overall recommendations to the project
